

THE OLYMPIAD

WELLINGTON COLLEGE, BERKSHIRE, UK

SPRING 2027 - Residential Junior Programme

AGE: 11-13; 14-17

LEVEL: B1, B2

DATE: 30th March – 13th April

QUICK FACTS: The programme has a duration of 14 nights and applies to groups of 15 students minimum.

Historic and traditional, a truly British experience.

This famous and prestigious boarding school provides a world leading educational environment, a wealth of first-class facilities, all set on an inspirational campus. Wellington College is one of the world's top independent boarding schools, winning 'Independent Boarding School of the Year' in the TES independent school awards. The school is set in 400 acres of beautiful parkland in the county of Berkshire, only one hour from central London and just 40 minutes from Heathrow Airport.

The school offers outstanding facilities, including an indoor swimming pool, extensive playing fields for a variety of sports and two state of the art sports halls. There is an onsite café, lots of space to relax and a brand new theatre, all on a safe and secure campus.

WHAT IS THE OLYMPIAD?

Our Olympiad programme offers students a **unique opportunity** to compete alongside other students from around the world in a competition filled with fun challenges based on the **4 'C's' identified as essential for 21st century learning and, ultimately, student success.**

The Olympiad is a positive way for students to learn more about these key skills and compete in exciting and fun challenges that are scored through our bespoke points based system.

WHAT ARE THE 4 'C'S'?

Communication, Collaboration, Critical Thinking and Creativity. Students need these specific skills in order to enhance ways of thinking, learning, working and living in the world, helping them to prepare for their future success.

WHY ARE THE 4 C'S AND THE 21ST CENTURY SKILLS IMPORTANT?

For many years young people have been measured on their high school grades but now the bar for our young people is on university, career and real-world success. Both university and business leaders point to soft skills as being the key driver for success, either in education or in the workplace.

With the advancement of technology in recent years we are now having to prepare students for jobs that may not yet exist and we have to equip our young people with skills to help them prepare for the unknown!

Social media and access to huge amounts of data on the internet for example has provided students with a new set of challenges and they need new skills to navigate these challenges. Our Olympiad programme focuses on these skills.

SAMPLE LEARNING MODULES

• COLLABORATION

Our collaboration learning modules help students to develop a wider knowledge on the importance of collaboration, whether amongst their peers or on a global stage, as well as an understanding on the relevant theories of collaboration. We look at how we can develop best practice methods for inclusive collaborative practice and how working collaboratively can lead to a more socially fair society.

• CRITICAL THINKING

Students will learn about the principles of critical thinking including innovative problem solving methods. They will develop understanding of the importance of data analysis and analyzing facts to brainstorming in teams to solve problems. Left and right brain thinking and helping them to make better decisions.

• COMMUNICATION

We learn about the barriers to good communication and teach skills on how to interact with others effectively and skillfully. We look at active listening and dive deeper in to the communication skills required to counsel, persuade, elaborate and describe, as well as look at non verbal communication clues.

• CREATIVITY

This learning module is designed to develop a deeper understanding of the importance of creativity and innovation. We will look at the characteristics of creative thinkers and how we can develop confidence in our students to be more creative and innovative and what the blockers to their own creativity may be. This is a fun module that will also push people outside of their comfort zone as they begin to push through their own blockers and begin to innovate!

DO STUDENTS NEED TO PREPARE BEFORE THEY TRAVEL?

Students will not need to prepare before they travel, part of the programme will support them in their preparation and provide them with time to get ready for the Olympiad challenges. Please note that there is a talent show at the end of the first week.

Teams will be international, meaning participants will be mixed with students from different countries while competing, encouraging further collaboration and team work.

The Olympiad is ultimately a fun learning experience and we want all participants to go home having had an enjoyable time with us!
